

VISHAK S

BACKEND ENGINEER

Bengaluru, India | +91 9791921736 | vishak1736@gmail.com | linkedin.com/in/s-vishak

PROFESSIONAL SUMMARY

Backend Engineer with 4.5+ years of experience building production-grade backend systems, REST APIs, payment integrations, and asynchronous workflows using Python, Django, Django REST Framework, and FastAPI. Currently leading backend architecture and technical decisions for EZY Helpers' internal CRM platform, supporting 10,000+ customers and 30,000+ helpers. Experienced with PostgreSQL/MySQL, Kafka, Celery, Redis, Docker, AWS, CI/CD, RBAC, webhooks, reliability, and production incident resolution.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework, FastAPI, RESTful APIs, microservices

Databases: PostgreSQL, MySQL, Django ORM, schema design, indexing, query optimisation, migrations

Async & Messaging: Kafka, Celery, Redis, task queues, caching, event-driven workflows, webhook processing

Cloud & DevOps: AWS (EC2, S3, RDS), Docker, Nginx, Gunicorn, GitHub Actions/CI/CD, Git, Sentry

Security & Integrations: RBAC, JWT/token authentication, SSL/TLS, Razorpay, OTP, e-signature, third-party APIs

Additional: JavaScript, React.js, Pandas, NumPy, Pydantic, Redash

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Aug 2026 - Present

EZY Helpers

Bengaluru

- Lead backend architecture and technical decisions for CHAP, an internal CRM platform serving 10,000+ customers and 30,000+ helpers.
- Lead and mentor 5 engineers through code reviews, engineering standards, backend design decisions, and production troubleshooting.
- Drive backend performance optimisation, system reliability, safe releases, and production incident resolution across core services.

Full Stack Engineer

Feb 2026 - Aug 2026

EZY Helpers

Bengaluru

- Built and owned CHAP's backend on Django and PostgreSQL, including multi-stage Celery/Redis pipelines, Razorpay payments, WhatsApp webhooks, OTP, and e-signature integrations.
- Designed REST APIs with RBAC and token-based authentication for web and mobile clients, and implemented reliable third-party integration and webhook flows.
- Managed production deployment using AWS, Docker Compose, Nginx, SSL/TLS, and CI/CD workflows.

Associate Software Engineer - Backend / Integrations

Feb 2025 - Dec 2025

Jodo Fintech

Bengaluru

- Built Python payment microservices for high-volume financial transaction and integration workflows.
- Implemented Kafka event streaming and Celery-based asynchronous processing, plus webhook retry and fault-tolerant partner integrations.
- Containerised backend services with Docker and supported AWS CI/CD deployments in a regulated fintech environment.

Junior Software Developer

Apr 2022 - Feb 2025

Infinet Solutions

Coimbatore

- Developed backend systems and REST APIs using Django and Django REST Framework across multiple SaaS products.
- Designed PostgreSQL/MySQL schemas, optimised ORM queries, implemented indexing strategies, and managed safe database migrations.
- Built bulk CSV/XLSX/PDF data-processing pipelines with Pandas and deployed applications using AWS, Nginx, Gunicorn, and Git-based CI/CD.

SELECTED BACKEND PROJECTS

CHAP - Internal SaaS CRM Platform | Django, PostgreSQL, Celery, Redis, Razorpay

- Architected async communication, payments, WhatsApp pipelines, OTP/e-signature flows, RBAC, and operational APIs for a production CRM used at scale.

TrendPulse - Event-Driven Stock Analytics Platform | FastAPI, PostgreSQL, Celery, Redis

- Built a FastAPI backend and event-driven data pipeline integrating multiple external APIs, with asynchronous processing and PostgreSQL persistence.

Payment & Integration Platform | Python, Microservices, Webhooks

- Designed payment microservices with idempotent webhook handling, retry mechanisms, real-time notifications, and automated subscription billing workflows.

EDUCATION & CERTIFICATION

Bachelor of Science in Computer Technology - Nehru Arts and Science College, Coimbatore | 2018 - 2021

AWS AI Practitioner Challenge - Udacity | Apr 2026
